Web Security Premium Suite

Small and Medium Businesses (SMB) can point all their Internet traffic to the Zscaler Web Security Cloud. The cloud protects against viruses, spyware, botnets and thousands of other advanced Internet-based threats. The cloud also provides a full suite of URL filtering capabilities. Unwanted URL categories can be blocked, while productivity draining categories can be controlled. Overall internet usage can be easily monitored with a simple cloud-based reporting portal. Web security made simple for the SMB
